

Meticulous attention to detail in estate grounds maintenance

Garden Care

A beautifully manicured lawn, and flawless gardening, are the best "curb appeal" insurance you can buy for your home.

Does your property need a makeover? Real estate agents and fixer-upper investors depend on garden detailing, or perhaps a more extensive overhaul, to transform the ugly duckling on the street into a real charmer. Attractive landscaping and a well maintained lawn and garden can significantly increase the value of your home, while enhancing the enjoyment of your property.

Attention to the smallest detail is what sets me apart from many of the larger firms. My name is on everything I do, and I take great pride in being hands-on.

Regular scheduled garden care plans usually include soil amending, compost and mulch maintenance, turning of planting beds, fertilization, topdressing as required, weeding and edging. The beds are cleaned of twigs, leaves and litter.

I enjoy revitalizing dull and uninteresting gardens. Seasonal splashes of colour can be added with the planting of Spring bulbs and summer annuals. Urns and other containers can also be inserted to display flowers, foliage and even dried materials.

Some of the plants in your garden will probably benefit from my expertise in pruning and training. Pruning encourages healthy growth in the following year and manages the shape and size of the plants. Vine work on trellises, arbors and walls are pruned and shaped where required. I am an I.S.A. certified arborist.

I can also handle any plant and tree installations and transplanting. Your maintenance plan can also include leaf clean-up, cleaning of walkways and water features, and pressure washing of decks.

I look forward to putting together the ideal lawn and garden maintenance program for you.
