Magis Canadian online store

Until quite recently, Magis was one of the few companies that designed functional art in plastic. Magis uses the most advanced molding technologies and techniques. It was the first company in the world to apply air moulding to aesthetical goods. Plastic will remain Magis' reference material, although it is now experimenting with others such as die-cast aluminium, aluminium metal sheet and wood. Magis partners with internationally renowned designers, but has always been open to work with young designers, even at the onset of their careers. Founder Eugenio Perazza is always directly, passionately and very enthusiastically involved in the development process of the products.

Contrasted with Cappellini, Danese Milano, Flos, Kartell or Zanotta, Magis does not belong to the traditional Italian companies of the 50s and 60s which were founders and shapers of Italian Design. They offer a fresh collection of every day use and seating products, created by such renowned designers as Konstantin Grcic, James Irvine, Jasper Morrison, Stefano Giovannoni, Michael Young, Marc Newson and Karim Rashid. The company earned kudos from the trendsetter's bible, Wallpaper, which placed Perazza on top of its list of "Ten who will change the way we live".

We are proud to offer **Magis Design products** in our Squamish location and online store.
