TILE ROOFING, VANCOUVER

Tile roofs add a distinguished appearance, elegance and value to your home. Adding a beautiful tile roof to new paint and perhaps some stone masonry is one of the best ways to create that wow factor to a home, exponentially increasing the resale value and marketability.

A tile roof is an investment in quality. Tile roofing lasts many years longer than traditional asphalt shingles. While the initial costs can be higher for tile, the extended life of the roof, the many years of aggravation free use and savings in energy costs can provide a significant return on investment within a relatively few years.

Many people are surprised that roof tiles compete favourably with shakes in pricing. Tile roofing comes in a wide range of price points, ranging from affordable concrete tiles to imported natural clay tile. Tile roofs can last well beyond 50 years. They are fire safe; they will not burn like many other roof materials. Tiles can be used to replace traditional roofing materials. Tile roofing is one of the most eco-friendly and sustainable materials.
